

Build your own DeskHog

Instructions

The name of the game is hedgehog building and lucky for you it's super easy. All you have to do is follow these instructions and soon you'll have your very own DeskHog!

- 1.** Begin by carefully cutting out the whole shape on the next page. It's easiest to use a scalpel, but be careful not to cut the folding lines — you will need those later.
- 2.** When the shape is entirely cut out, begin folding the flaps down along the folding lines. You will have a pretty strange looking thing in front of you, but keep going!
- 3.** Starting with the smaller parts around the face, slowly glue the flaps together. Hold them until the glue has fully dried before moving on to the next one.
- 4.** Working your way outwards, continue to glue the flaps and your DeskHog will begin to take form!
- 5.** Congratulate yourself for creating a beautiful little DeskHog and send a picture to @posthog on Twitter so we can share in your joy!
